

HÄGGLUNDS

Driving value beyond the machine

FOR MARINE, INDUSTRIAL, AND MOBILE APPLICATIONS

If movement is central to what you do, it's the very core of what we do. Every aspect of a Hägglunds solution – from our hydraulic drive systems to the knowledge and support we integrate with them – delivers and protects the motion you depend on.

It's a total commitment, from the technical to the personal. If it isn't driving you forward, it simply isn't Hägglunds.

Hägglunds drive systems and solutions are ideal for applications needing high torque and low or variable speed – from crushers and conveyors to mills and winches.

Customers in industrial, marine and mobile industries all trust Hägglunds solutions to keep them productive.

Get more from today and the future

HÄGGLUNDS POWERFUL SOLUTIONS

A Hägglands solution is a total solution – of which the drive system itself is only one part. It's a complete answer to your needs, built as much on knowledge, experience and commitment as it is on drive technology.

From biggest to smallest, our Hägglands solutions are built with modularity in mind and offer a full range of products and solutions to meet your needs.

Hägglands means peace of mind, throughout your drive's lifetime. Whether aiding you on site, supporting you with application knowledge or using connectivity like Hägglands CMP to keep your drive healthy, our experts are at your side. Locally or globally, physically or digitally, we go the distance to take you further.

Our vast service portfolio has everything you need to protect and enhance your Hägglands investment. From modernizing to maximizing service life – here you'll find sustainable solutions for your drive and business.
